Called PartyThe called party is the person who has received the telephone call The end point of the route may be on the Internet or may be at a point that was reached by routing the call through the public switched telephone network.. Most of the recipients of telephone calls receive the calls with a landline phone or with a cellular phone.. The process may seem simple to individuals who do not experience problems with making telephone calls but is not so simple to individuals who make calls that will not connect such as calls to a different country.
